Profile Summary

Computer Science (AI) undergraduate with experience building full-stack and AI-powered applications using the MERN stack, Python, and LangGraph/MCP. Strong foundation in DSA, database management, SQL, and API development, with an interest in data-driven problem-solving and building scalable, reliable applications.

Education

Vishwakarma Institute of Technology — Pune, India
B.Tech, Computer Science and Engineering (Artificial Intelligence); GPA: 9.4 — *Aug. 2025 – Present*

Government Polytechnic Pune — Pune, India
Diploma in Computer Engineering; Score: 93.2 — *Aug. 2022 – May 2025*

Projects

SAR Narrative Generator with Audit Trail | *Python, LangGraph, NLP, PostgreSQL* |
- Built an AI-powered system to auto-generate regulator-compliant SAR reports from transaction alerts, KYC, and case data modeled in a 10-table PostgreSQL schema, reducing manual effort from 5–6 hours to minutes
- Implemented LangGraph workflow with Human-in-the-Loop (HITL) for analyst review and a classifier model for false positive detection and priority scoring
- Built-in audit trail logging inputs, triggered rules, and typologies to PostgreSQL with role-based access control ensuring regulatory defensibility and enterprise readiness

Eva – AI Voice Cloning Studio | *React, FastAPI, XTTS-v2, PyTorch, MongoDB* |
- Built a self-hosted, full-stack voice cloning platform enabling zero-shot voice cloning from as little as 10 seconds of audio using XTTS-v2 on a CUDA-accelerated backend
- Optimized audio preprocessing and cached speaker embeddings to reduce redundant processing.
- Built secure voice libraries using Clerk and MongoDB Atlas, supporting audio recording, TTS generation, and favorites management.

Professional Experience

Software Developer Intern — Oct 2025 – Feb 2026
Lumenith Technology — *Pune, India*
- Developing features for LearnComplexity, a Learning Management System (LMS), working across frontend and backend modules
- Optimizing multiple platform workflows and processes to improve efficiency and reduce manual effort

Software Development Intern — Jun 2024 – Jul 2024
Linkcode Technologies — *Pune, India*
- Developed a full-stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js), translating Figma wireframes into responsive, production-ready UI
- Designed RESTful APIs with secure authentication and session management, and modeled application data in MongoDB

Technical Skills

Languages: Python, SQL, C++, JavaScript, HTML5, CSS3
Databases & Data: PostgreSQL, MongoDB, Data Modeling, Data Validation
Frameworks & Technologies: React.js, Node.js, Express.js, FastAPI, LangChain, LangGraph, REST APIs
Tools: Git, GitHub, Postman, Figma

Achievements

Research Publication: Co-authored a paper on Deep Learning-Based Accident Detection, AIR 2026, Kazakhstan
Hackathon Achievement: Runner-Up, Bharat Build Tour (First Commit Hackathon) by AWS & WeMakeDevs
Certifications: Deloitte Data Analytics Job Simulation (Forage); Coursera Certificates
